

Everything in WITS has a time and date stamp. When you are entering a problem in the problem list, it will not pull through to the encounter/ note unless the date and start time are prior to the service time. Therefore, please enter a date and start time that is earlier than when the problem was identified. For instance, if you meet with a client on July 1, 2022 at 9:00 am where you identify a new problem, please enter a date and time before the meeting such as July1, 2022 8:00 am on the problem list. After you have changed the date and time, click **SAVE**.

After you have saved the date and time, select "Edit Diagnosis"

To access Substance Use diagnosis, select "Behavioral". To access Social Determinants of health (Z Codes) select Psychosocial.

You can start typing either the F Code, Z code (between Z55 and Z65 are allowable) or the DSM 5 description text to find the diagnosis you are looking for.

The screenshot shows a 'Client Diagnosis' form. The 'Type' is set to 'Psychosocial'. The 'Diagnosis' dropdown is open, showing search results for the term 'home'. The results include several Z and F codes with their corresponding descriptions. The 'Principal Diagnosis' is set to 'No'. The 'Comments' field is empty. Below the search results, there are sections for 'Behavioric' and 'Actions' with edit icons.

Once you have selected the correct diagnosis or Z code, please add the diagnosing clinician to the comments section. Please remember that it must be within the person’s scope of practice to diagnose for the specific type of problem.

- Behavioral Problem List Items: LPHA
- Z Codes Problem List Items: LPHA, Registered or Certified Counselor, Certified Peer Support Specialist

The screenshot shows the 'Client Diagnosis' form with 'Z59.02 Unsheltered Homelessness(DSM 5)' selected in the 'Diagnosis' dropdown. The 'Principal Diagnosis' is 'No'. The 'Comments' field contains 'Diagnosing Clinician: Fred Meyer, CADAQ'. Below the form, there is a 'Behavioral Diagnosis' table with the following data:

Actions	Code	Description	Comments
	F10.20	Alcohol dependence, uncomplicated	Diagnosing Clinician: LaRee Marquardt-Byrd, LMFT

Final Problem lists will have multiple Problems listed. Please ensure that the primary issue is an included Z code (during the assessment period) or F code (during or post assessment) as whatever the primary problem is at the time of service will populate on the encounter.

As a reminder, providers shall add to or end date problems from the Problem List when there is a relevant change to a beneficiary's condition. The name and title of the provider that identified, added or removed the problem, and the date the problem was added or removed, should be noted.
